## **WHO WE ARE**

Points Athabasca is a diversified, Aboriginal-owned general contracting company, and since 1999, we have built an impressive portfolio of high quality projects in a wide variety of areas. We believe in building beyond the project, and our slogan “Building Capacity” speaks to our high level of commitment to engaging people in the local communities.

Formed as a partnership between Athabasca Basin Development and Graham Construction, Points Athabasca has been recognized with an ABEX award and is one of SaskBusiness Magazine’s Top 100 Saskatchewan companies.

## **VISION**

Building capacity through project excellence.

# **POINTS ATHABASCA**

## **WHEN IT COMES TO UNDERGROUND CONSTRUCTION, EXPERIENCE MATTERS.**

Many of the world’s most complex construction projects happen hundreds or thousands of feet below the surface. For these unique and sometimes challenging projects, experience is vital to success.

Points Athabasca is a full service contractor that has been providing construction services to the mining industry for over fifteen years. With a large portfolio of successful projects exceeding \$500M, and a multi-disciplined team with years of experience, we are capable of completing any underground construction project. Our team of professionals provide smart solutions, from the early planning stages through to project close-out, to solve your specific construction challenges. No matter what your requirements when planning your project, we can provide you with the resources to complete your project on time and within budget.

*Points Athabasca is committed to providing the highest quality of service through local participation and developing capacity in local and impacted areas.*

# BUILDING BELOW THE SURFACE

## QUALITY SERVICE: FROM THE EARLY PLANNING STAGES TO PROJECT CLOSE OUT.

We draw on our experience to conceive, design, construct and commission installations that make underground construction of all sizes and complexities safer and more efficient for our clients.

Before your project begins, you can tap into the lessons we've learned from our past experience and use our innovative process improvement consulting services to assist with project initiation.

Whatever your needs, we'll help you bring your ideas to reality. We offer extensive experience in:

- **Underground civil projects.** Concrete form and pour, ventilation control walls, sump construction, water stops etc.
- **Process and mine projects.** Piping, steel work, steel sets, steel and lattice girder shotcrete support structures.
- **Mine infrastructure and maintenance projects.** Pipe installations, loading pocket, skip and truck chute repairs, rebuilds or installations, pumping and process systems, etc.

- **Mine salvage.** Cost effective removal and reclamation of mine infrastructure and materials from mined out areas recycling and returning substantial value to inventory.
- **Term labour services.** We can provide a complete range of tradespeople to support your teams with term or project work. Electricians, welders, millwright / mechanics, plumbers, equipment operators, miners and general labourers available to fill your labour requirements.
- **Professional shotcrete and grouting services.** Shotcrete ground support application, water inflow and void fill solutions using high pressure conventional cements and chemical grouts.

## SAFETY IS OUR TOP PRIORITY

Making sure everyone goes home safe benefits everyone. That's why safety is written into everything we do, for every project, for every minute of the day. As a Saskatchewan Construction Association COR Certified company, we work closely with the SCSA to ensure we follow the highest industry standards. We see safety as a continual drive for achievement and improvement, and we strive for zero incidents on each project through sound management and use of our resources, a comprehensive system, and strong supervisory presence.

## BEYOND THE PROJECT: BUILDING CAPACITY

"Building Capacity" is a key theme for our company and drives how we do business. We look for ways to go beyond job creation, and leave a legacy that will remain long after the project is completed. We are proud of our outstanding track record of success in using resources from local businesses, community investment, and hiring, training, and mentoring, people from local communities which has a lasting positive impact on the communities in which we work.
